INTERNATIONAL ENERGY AGENCY

IMPLEMENTING AGREEMENT ON TECHNOLOGIES AND PROGRAMMES FOR DEMAND SIDE MANAGEMENT

Task XXIV: Closing the Loop - Behaviour Change in DSM: From Theory to Practice

Task Status Report March 2012

Dr Sea Rotmann, Operating Agent, New Zealand drsea@orcon.net.nz
Dr Ruth Mourik, Operating Agent, Netherlands info@duneworks.nl

Prepared for the EXCO meeting in Trondheim 18-21 May, 2012.

At the Executive Committee meeting in November 2011 in Jeju Island, the Executive Committee members decided to start Task XXIV. The Task definition and legal annex were quickly finalised with the help of many international experts and the Task started in January 2012.

SUMMARY OF OBJECTIVES AND SUBTASKS OF THE TASK

Objectives

DSM aims at releasing the vast potential for cost-efficient energy efficiency that is locked in on the demand side (i.e. with the energy end-user). Releasing this potential however, proves very challenging, for various reasons. Several issues are crucial in harnessing this potential and this proposal aims at tackling these issues. For example, humans rarely behave economically rational and understanding what drives human behaviour is incredibly complex. Behaviour change researchers from different disciplines don't interact enough, and their research often fails to get translated into smarter policymaking and programme design. In addition, it is extremely hard to evaluate ongoing behaviour change outcomes.

This Task sets to uncover, unravel and define these challenges, to break down interdisciplinary silos, further the international research and to provide clear recommendations to policymakers and funders and implementers or DSM programmes.

The overall objective of the project is to draw on the knowledge and learnings of an international expert network that will help policymakers, funders of DSM programmes, researchers and DSM implementers to:

- Interact, share learnings and build up a common interdisciplinary, international knowledge base on context-specific energy using behaviours and their drivers and barriers;
- Build the research and body of knowledge further on the basis of a clear understanding of needs of individual countries and their researchers;
- Make better decisions about designing and funding future behaviour change research and DSM projects/programmes;
- Monitor and evaluate the effectiveness of behaviour change DSM projects and programmes (research or implementation).

Approach

The Task is broken into six distinct subtasks, which follow a logical structure from 1) behavioural research theory; to 2) DSM best practice, case studies and learnings; and 3) ongoing outcome evaluation of actual changes in energy-using behaviours.

Subtask 0 - Development and Utilisation of Expert Platform

- Overall project coordination and task management.
- Design, development and running of international expert platform.

Subtask I - Theoretical Inventory of Models, Frameworks and Disciplines

- Identify the range of behavioural models, frameworks and disciplines that have relevant insight into human behaviour and energy demand side management in a variety of end-use sectors.
- Understand the benefits of applying different models/approaches/frameworks to different contexts (target group, targeted behaviour, country, scale, technology, timing etc).

Subtask II - Praxis. Context and Case Studies

- Collect 5 exemplary DSM cases per participating country (preferably in different end-use sectors).
- Make a country- and sector-specific inventory of all contextual factors influencing effectiveness of DSM programmes.
- Identify key approaches to solving, circumventing or using contextual issues on the local, regional and national level and share learnings and best practice.

Subtask III - Analysis

- Conduct a detailed analysis of data collected in Subtask 1 and 2.
- Validate the collected data.
- Set up a database that will be available online for continuous use after completion of the Task.

Subtask IV - Monitoring and Evaluation

Develop practical, context-specific monitoring and evaluation tools for DSM projects and programmes.

Subtask V - Recommendations and Guidelines

 Develop guidelines for different types of stakeholders/countries/sectors/goals of DSM research, policy and programme activities and disseminate them. In particular, the countries participating in the task will receive tailormade guidelines for both research and policymakers.

Documentation and Publications

The Operating Agents have outlined and publicised their Task in the

- IEA DSM Spotlight 43 Issue, December 2011
- IEA DSM Task Flyer XXIV
- IEA DSM Task XXIV Workplan
- IEA DSM website, twitter, facebook and linkedIn
- Weekly publication of energy and behaviour change news by Dr Sea Rotmann
- On the company website of Dr. Ruth Mourik, DuneWorks
- In the internal ECN (Energyresearch Center of the Netherlands) Newsletter, December 2012

Time schedule

The total length of the Task is 18 months with participation of 4 countries, or 2 years with participation of 4+ countries. It was started as planned in January 2012 and will end in July 2013 or December 2013, respectively.

Phase / Duration of the action (in months)	1-2	3-4	5-6	7-8	9-10	11- 12	13- 14	15-16		19- 20	21- 22	23-24
Subtask 0: Management						12	14		10	20	22	
Subtask 0.1 Overall coordination of the project												
Subtask 0.2 Design of a Stakeholder Engagement Plan												
Subtask 0.3 Design of the online platform and specification of its individual components/preparation of expert consultations/expert platform												
Subtask 0.4 Utilisation of ongoing expert platform												
Workshop to finalise task definition in Austria/NL plus VC, ExCo meeting sign-off in Norway April 18, 2012		WS Aut/ NL			ExCo			ExCo			ExCo	
Subtask 1: Inventory of models, frameworks and disciplines												
Subtask 1.1 Inventory of available models, frameworks and disciplines												
Subtask 1.2 Analysis of applicability of models in differing contexts												
Subtask 1.3 Development of baseline report on models and frameworks and their contextual applicability												
Workshops in NL and UK				WS NL	WS UK							
Subtask 2: Collection of case studies and inventory of context factors												
Subtask 2.1 Detailed characterisation of targeted cases and development of case study template												
Subtask 2.2 Inventory of key context factors and success stories and learnings												
Subtask 2.3: Development of baseline report on context factors influencing DSM activities												
Subtask 2.4: Development of country-specific DSM case analysis and successful context factors approach												
Workshops and webinars in NL and UK (same as in subtask 1)				WS NL	WS UK	Web						
Work package 3: Analysis												
Subtask 3.1 Build-up and continuous updating of database												
Subtask 3.2 Detailed analysis of contextual factors												
Subtask 3.3 Quality check, user-friendly development of available data and synthesis												
Subtask 3.4 Development of country/sector and DSM specific recommendations for successful implementation and outcome analysis												
Workshops in NZ and Belgium/webinars/VC				Web		Web		WS NZ	VC		VC	
Work package 4: Development of Monitoring and Evaluation Indicators												
Subtask 4.1: Identifying relevant indicators/metrics/tools for monitoring and evaluation of DSM project and programmes												
Subtask 4.2 Assessing context sensitivity of indicators/metrics/tools												
Subtask 4.3: Developing and testing monitoring and evaluation web-based tool												
Workshops New Zealand, Belgium, Switzerland								WS NZ	VC	WS CH	VC	WS Bel
Work package 5: Guidelines												
Development of stakeholder-tailored guidelines for successful context (country) sensitive implementation, monitoring and evaluation of DSM projects												
Development of the dissemination plan												
Traditional dissemination activities												
Web dissemination activities

18 months duration	24 months duration	24 months duration	24 months duration

The countries will be invoiced in two amounts (Beginning of 2012 and Beginning of 2013 with 4+ countries and 24 months duration; Beginning of 2012 and October/November 2012 with 4 countries and 18 months duration). In addition to the cost sharing to the OA budget, each country will be required:

- to provide expert time of approximately 1 person-months a year
- to attend six meetings/workshops of the Task and prepare for them
- to host a meeting/workshop during the lifetime of the Task
- to carry out the national dissemination activities,
- to provide us with all relevant publicly available material produced in that country, plus
- · to actively engage in the expert platform.

Participation

Ten countries expressed the strong interest in the Task, the Netherlands and Switzerland have confirmed their participation; New Zealand and Belgium are in the final stages of confirmation. In addition, we await notice of (non-) participation from the US, UK, Norway, Finland, Sweden, Austria. Several non-DSM countries have also expressed interest, including Germany, Denmark, Australia and Saudi Arabia. In addition, there are countries that have expressed the willingness to participate as sponsor with in-kind expert time (Spain for example offered 1.5 to 2 expert person months).

ACCOMPLISHMENTS SINCE January 2012

Negotiations with all potential countries are continually underway. In several countries, the negotiation process related to financing is quite slow, although it was quite easy to attract interested participants/experts in the potential countries. Since the November 2011 EXCO meeting, Switzerland has confirmed its participation and Belgium and New Zealand are in the final stages of sign-up. New Zealand has re-joined the DSM Implementing Agreement specifically to participate in this Task. Over 70 interested experts from 10+ countries have expressed interest and/or contacted their relevant EXCO members to foster support for country participation. We hope to have 8-10 countries participate and/or sponsor this Task, as it requires the widest input of experts possible.

In order to administer communication with so many different experts, the OAs have created an online database using the Capsule Contact Relationship Management (CRM) system. The OAs are tracking all email correspondence and tasks using this system. In addition, the task has been publicised widely using peer-to-peer communication but also using social media (twitter, facebook, linkedin, google+) and the IEA DSM website. One of the OAs has also been asked to become a columnist for the European Council of Energy Efficient Economies (ECEEE), sharing regular behaviour change insights. A weekly newspaper on Behaviour Change & Energy is published and publicised using these channels as well

(http://paper.li/DrSeaRotmann/1326936272?utm_source=subscription&utm_medium=email&utm_campaign=paper_sub).

The OAs have also received funding for their UK workshop from the UKERC Meeting Place. In order to get funding, the OAs had to get the top UK behaviour change research experts to agree to become part of a steering group to organise the meeting. All but one of the experts have agreed to become steering group members and/or participate in the workshop, where Subtasks I & II will be discussed.

The first expert meeting will be arranged as a mixture of face to face meetings in Austria and the Netherlands on April 10, complemented with a webinar on 12 April 2012. The results will be reported to the Trondheim April EXCO meeting. The operating agents have produced the following draft report to be discussed at the expert meeting:

IEA DSM Task XXIV Draft Workplan

The Operating Agents have participated in the following meetings/workshops: none directly related or linked to the task yet

WORK PLAN FOR THE NEXT 6 MONTHS

- Finalise the workplan definition and present for sign-off at Norway EXCO
- Design a Stakeholder Engagement Plan
- Design and test online expert platform
- Finalise country participants and national experts
- Start inventory of available behaviour change research models, frameworks and disciplines
- Collect country case studies
- · Create inventory of context factors
- Prepare the UK workshop
- Prepare participation in several conferences, namely the BEHAVE conference in Helsinki and the ECEEE conference in The Netherlands. Submit abstracts for Behaviour conference in the Azores in September and BECC in the US in November.

MATTERS FOR THE EXECUTIVE COMMITTEE

Sponsoring countries - to what extent can we utilise experts and in-kind contribution from non-DSM countries?
