

**a large system view French Pilot
project on Smartgrids**

**N. Hadjsaid
On behalf of the consortium**

April 25th, 2012

GREENLYS

GreenLys

- Call for demo projects from (ADEME / French government)
- Pilot project proposal in two cities: Grenoble and Lyon
- Kick off November 2011

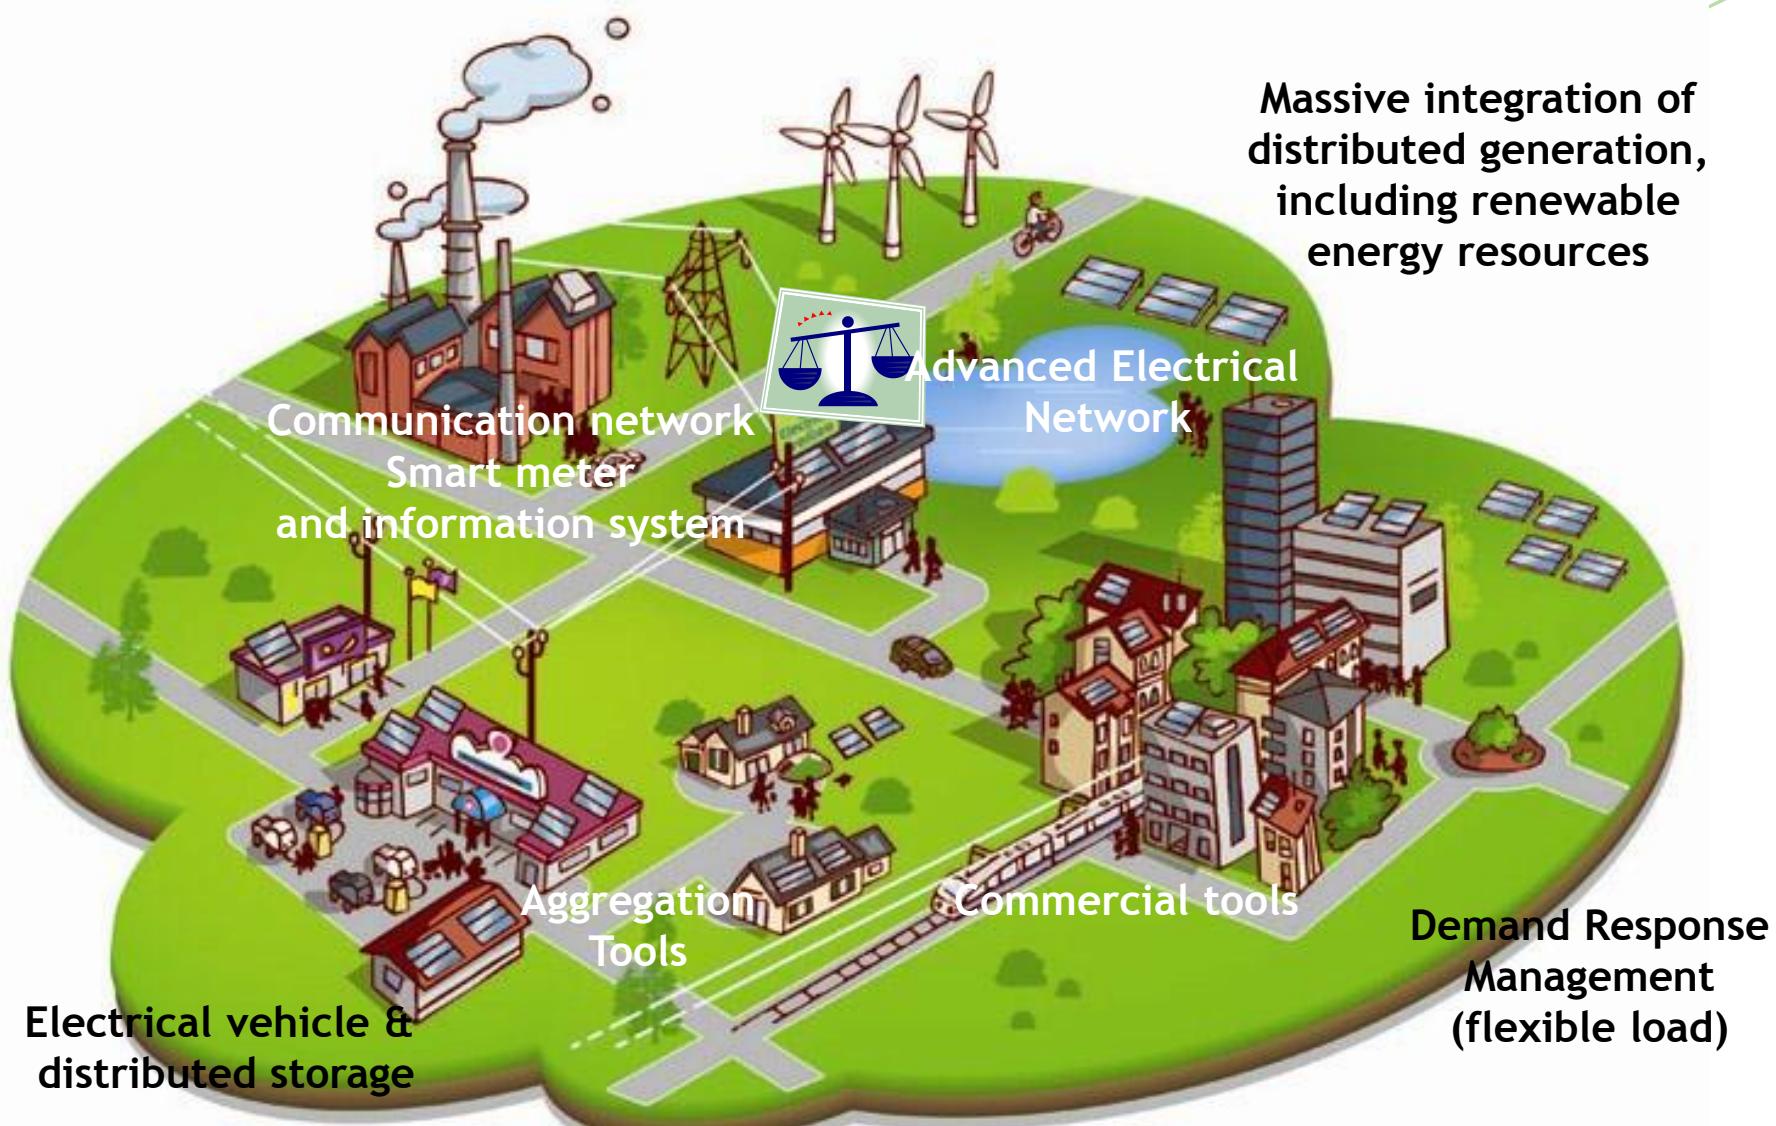

Agence de l'Environnement
et de la Maîtrise de l'Energie

GREENLYS:A value through system

view of Smartgrids

GreenLys

GREENLYS: Main characteristics

➤ 1-A consortium involving different types of smartgrids stakeholders

- ✓ Covering the value chain of the electrical system:
 - ✓ DSO, TSO, suppliers, technology providers (energy systems, ICT)
 - ✓ Universities and R&D centers
 - ✓ End-users, local communities, producers associations

➤ 2-A project to build up a systemic vision

- ✓ Coupling an advanced distribution network (operations and assets management) and advanced management of a complete DER portfolio (distributed generation, flexible loads and electrical vehicles) through AMI (Advanced Metering Infrastructure) including the LINKY smart meter

➤ 3-A demonstrator to experiment SG at real and significant scale

- ✓ Fours districts within two cities, representatives of a diversified population
- ✓ An ambition which could reach 2000 residential end-users (1000 in each city)
- ✓ Two complementary sites:
 - ✓ Nation wide DSO (ErDF – Lyon) and Integrated local DSO (GEG Grenoble)
 - ✓ Complementary experimentations (technological options, regulated or not tariff)

➤ 4- Expected results

- ✓ Analysis of the added value chain for market development
- ✓ Analysis of the transitions for larger scale smart grid deployment

3-c Lot 9.1 : *DEMONSTRATEUR ZONE LYON*

3-d: Lot 9.1 : ZONE LYON CONFLUENCE

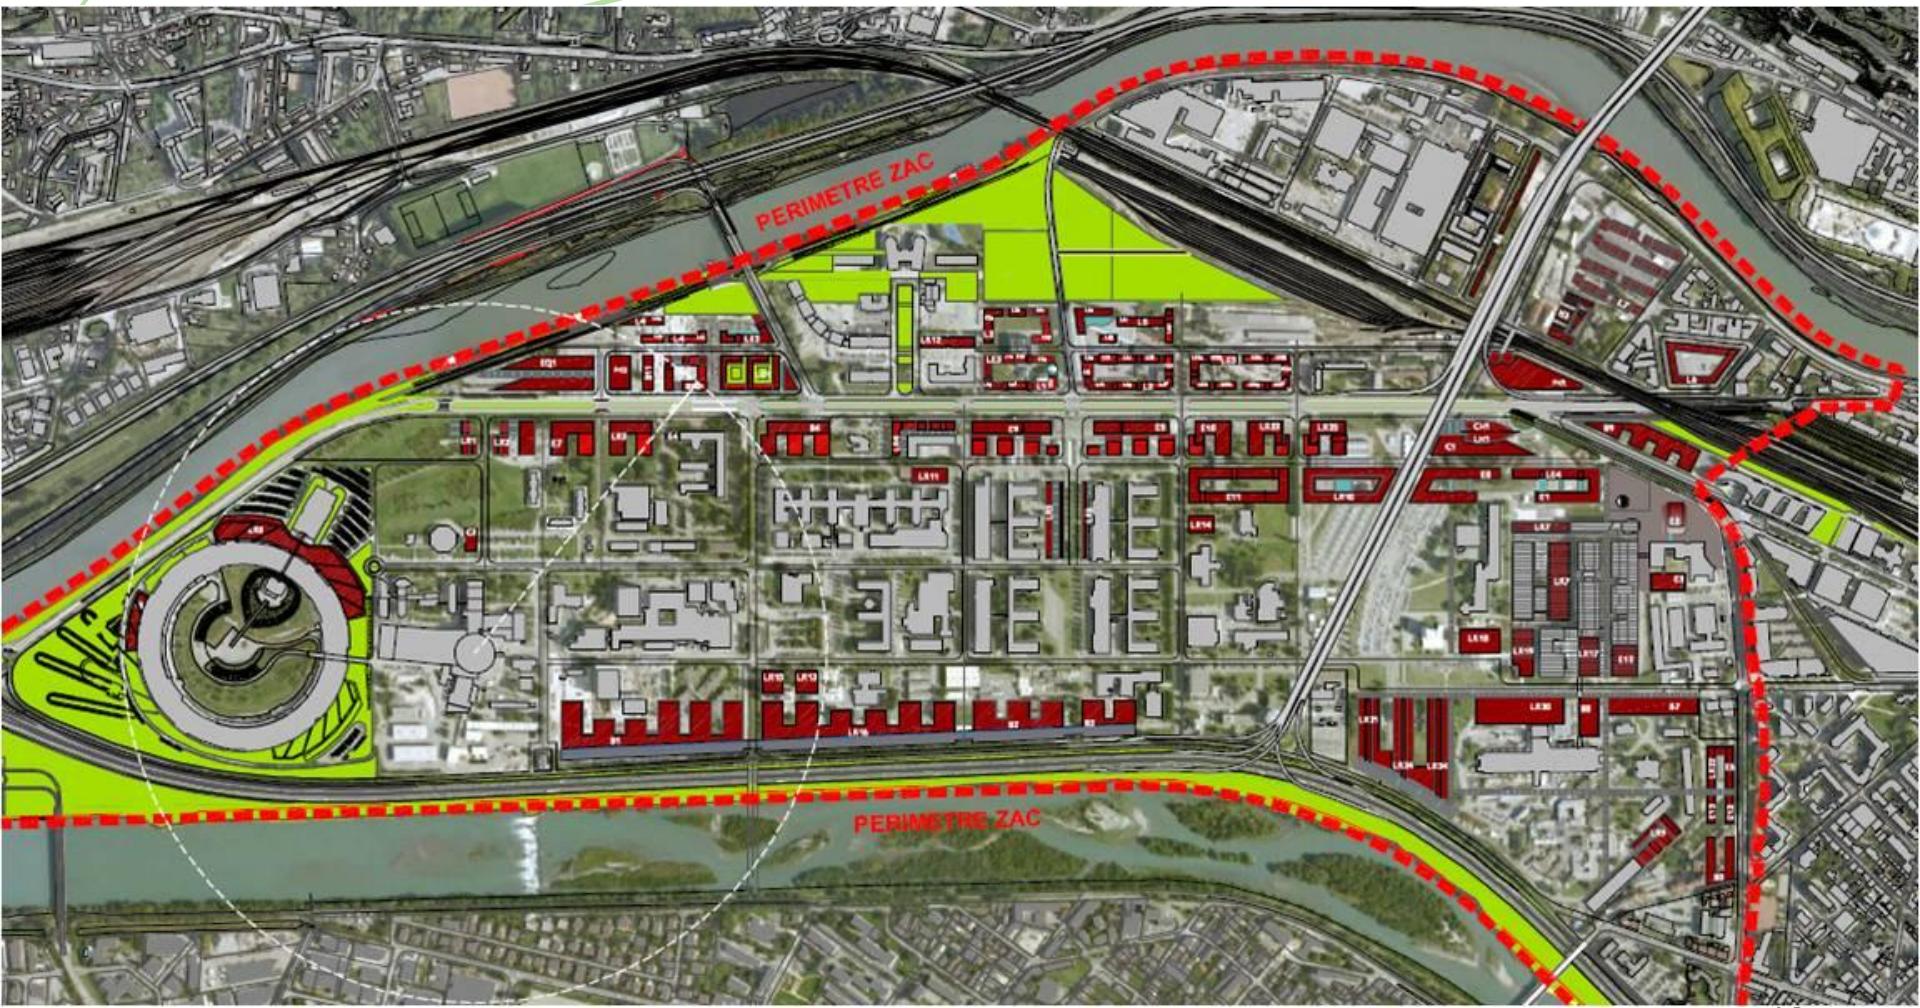

- 1. Place des Archives
- 2. Groupe scolaire, crèche et piste d'athlétisme
- 3. Bureaux et logements
- 4. Stade de football
- 5. Parc de Saône 1^{re} tranche (7 hectares)
- 6. Saône Park 175 logements
- 7. Lyon Islands 292 logements
- 8. Le Monolithe 147 logements et 15000 m² de bureaux
- 9. Capitainerie et MJC
- 10. Place nautique
- 11. Pôle de loisirs et de commerces + hôtel + parking
- 12. Hôtel de région
- 13. Immeuble de bureaux Eiffage
- Docks, quai Rambaud
- 14. Le Progrès
- 15. Espace Group (pavillon des radios)
- 16. Les Salins
- 17. Les douanes, 45 quai Rambaud (réhabilitation)
- 18. La Sucrière (réhabilitation)
- 19. Pavillon 6 (Rudy Ricciotti)
- 20. Pavillon 7 (Jakob Mac Farlane)
- 21. Pavillon 8 (Odile Decq-Benoît Cornette)
- 22. Musée

3-e Lot 9.2 : Caserne de Bonne

- Cogénération
- Photovoltaïque
- Poste HTA/BT de distribution

3-f Lot 9.2 : *Presqu'île*

Expected results

Added value chain

To identify and quantify the added value of the smart grids

Security and quality of networks

Economical added value

Environmental added value

Societal added value

1

To build up a system vision
of an innovative electrical system
For requirements

Environmental
Economical
Societal
Industrial

2

Global vision

Services
for the network

Experimentation of the
technologies for the massive
integration of the distribution
generation, in particular
intermittent renewable energy
resources

3

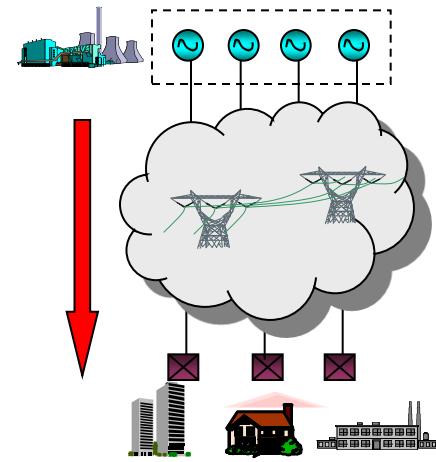

Services
for the end-users

Participation of the end-users
(active end-users, distributed
producers)

4

Specifications and management of transitions/technical steps

Todays's power system

Transition scenarios
Step structured

Technological transitions
IC Technologies
Power/energy technologies

Régulatory transitions
DG integration and grid access
System functions / and grid services
Balancing mechanisms, etc.

Economical transitions
Cost of system operations
Investments
Asset management...

Power grid with enforced intelligence

Increased integration
DG (REN), diffuse storage, PHEV
Charging mangt DR (BI)

Quality and reliability
Equal access to energy
Competitive cost of energy

Quality and reliability
Equal access to energy
Competitive cost of energy

**METHODOLOGICAL TOOLS
FOR GRID TRANSITION**

**TRANSFER FOR LARGE
SCALE DEPLOYMENT**

**LONG TERM
TRANSITIONS**

- The project has been submitted Nov. 2009!!
- The largest SG pilot project demo in France
- 40 M€ (Smartmeters/AMI not included -already funded)
- High expectations and foreseen difficulties
- A solid and engaged consortium
