## *Issue*

Problem: Rather few registrations for the webinar post-event; high quality content remains underexploited.

Solution: develop short policy briefs (~2 pages) post-webinar to re-promote content.

## *Next steps*

- Immediate1: DSM 101 (basic knowledge)
- Immediate2: Task 25 cases
- Immediate3: MOOC-facility (partner and format)
  - Organising webinars into learning programs leading to certification
  - E.g. program for utilities, for regulators, for engineers, ...

*Any Questions?*
