Delivering Innovation in **Power Engineering**

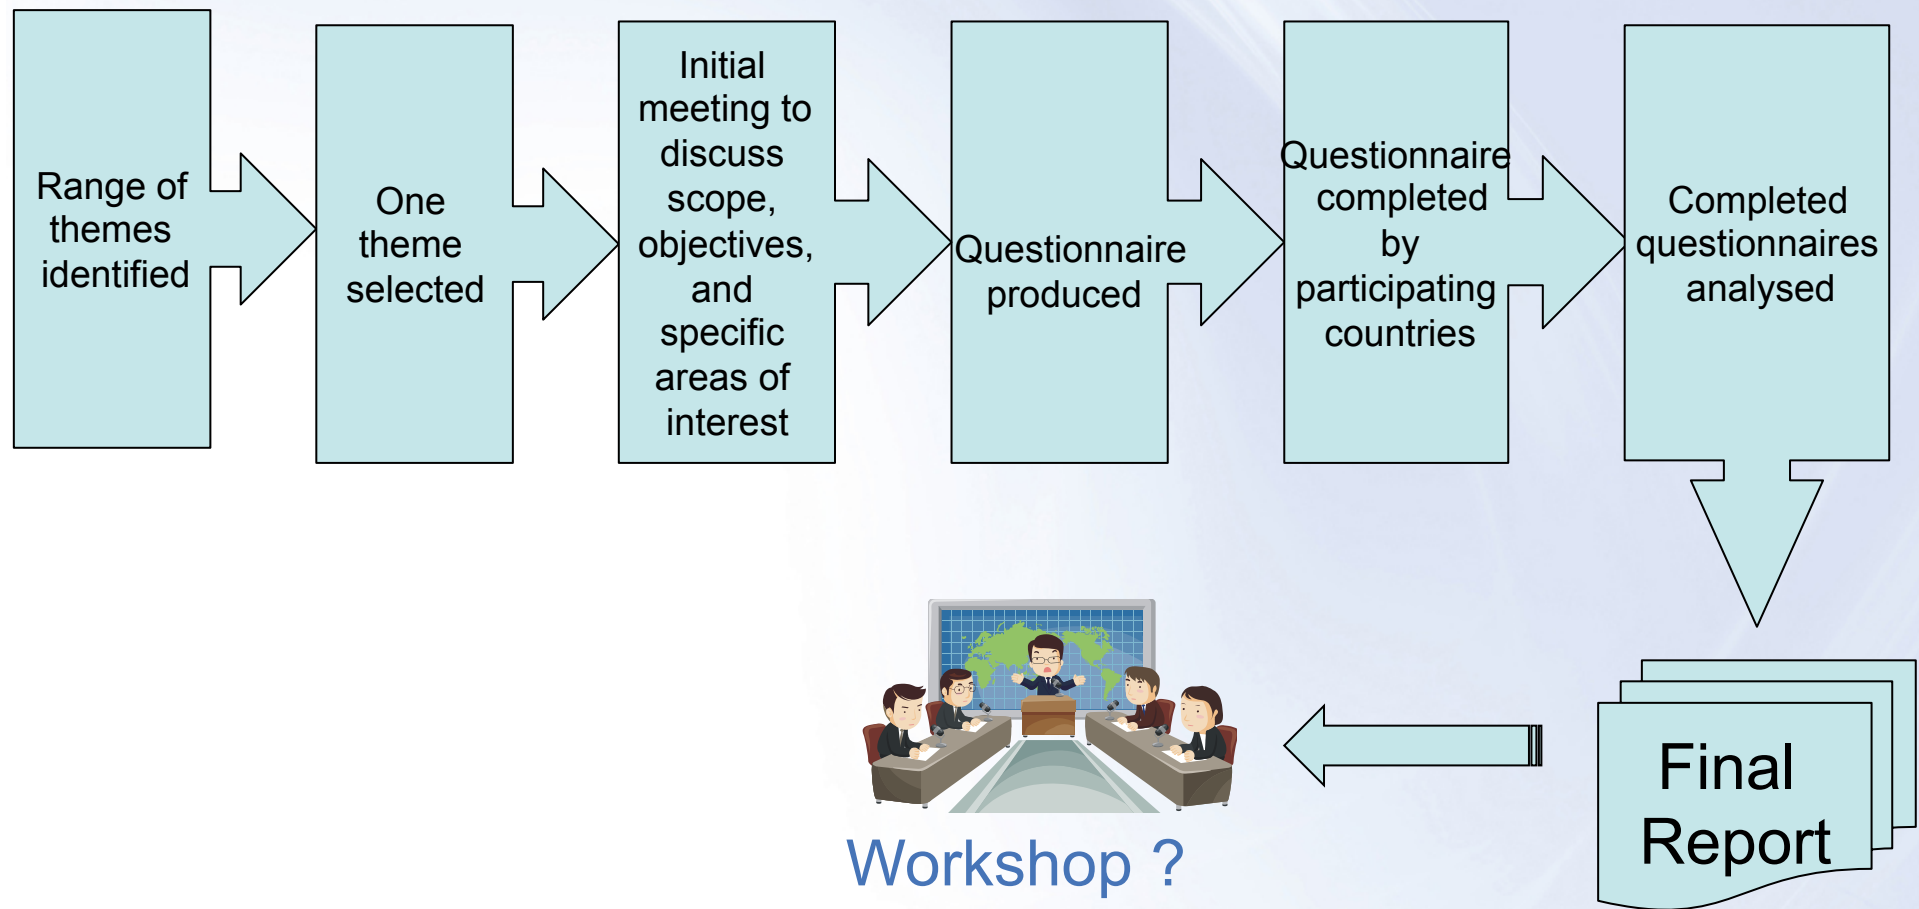

Information Exchange Forum

End of Term report 2008 - 2012

“A global exchange of experiences . . . in order for countries to develop both models for implementation that facilitates trade across borders and creates a base for facilitating/enabling technologies to be developed, produced, shipped and used in a way that improves their performance and makes the cost for the application acceptable.”

Information Exchange Forum

Approach

Information Exchange Forum

Objectives

- Facilitate the gathering, collation and exchange of information between participating countries on topics of common interest,
- Suggested themes
 - Approach to regulation, and how this impacts on the opportunities for DSM;
 - Stimuli for the development of DSM technologies and business models;
 - Expected new loads (e.g. electric vehicles, heat pumps) and their impact on the energy system.
- Operating Agent can be allocated on an initial fixed term to allow a variety of areas of interest to be covered,
- EA Technology would welcome the opportunity to act as Operating Agent for the first year of the Task

Information Exchange Forum

Output

- An annual report comparing and contrasting the experiences of the participating countries within the selected theme.
 - key synergies / differences will be identified
- Workshop to present findings
 - networking / outreach
- Over a period of time a library of information covering various themes will be accumulated
 - could be part of the DSM University
- Would act as a springboard to identify new areas for collaborative research
